

Exploring Heaven Through The Movies: Hollywoods Take on Heaven, Near Death Experiences, Ghosts, Angels and Reincarnation (Books About Heaven Book 3)

If you were an alien being on another planet and you wanted to study earth and the strange beings that were the dominant species there humans - one way you might find out what they are thinking would be to intercept some of their entertainment transmissions. Now imagine if alien anthropologists on another planet were able to examine only one aspect of our arts the movies. They would watch our movies and would then attempt to draw conclusions about what we are thinking based on the kind of films we make what their themes are, their messages and their plots. Thats something of the attitude we are going to take in this book. We have selected a number of key topics and were going to examine movies made about these subjects.

We are going to determine what conclusions can be drawn, and what insights we can gain about ourselves as people from how we choose to make movies. A lot can be told by observing which movies catch the public imagination to become popular classics and those that are flops and relegated to obscurity. The main topics we will focus on are the five key elements which belong to the realms of the mystical, esoteric, religious and spiritual: * Near Death Experiences * Heaven and the Afterlife * Ghosts and the Afterlife * Angels and the Afterlife * Reincarnation Its important that you know that we want this book to be more about having fun, than a serious and exhaustive sociological, anthropological study. Rather, we have presented the material in a way that we hope spawns debate among the readers! You may completely disagree with some of the conclusions we have drawn, or you may think were spot on. You also may not agree with the movies we have selected to highlight, and regret those that we left out. All the better! We hope what you read in these pages serves as a springboard for many a debate among your movie buff friends and mavens of the

esoteric. Remember that the cinema is an art form, and that the quality of art (or lack thereof) is always in the eye of the beholder. One persons excellent movie is anothers piece of cultural trash. The same general rule also naturally applies to this book then. Movies Put Under the Spotlight Include: * Resurrection * Flatliners * Fearless * Hereafter * Defending Your Life * Heaven Can Wait * What Dreams May Come * The Sixth Sense * Beetlejuice * The Haunting * The Others * Its a Wonderful Life * A Matter of Life and Death * Ive Lived Before * The Search for Bridey Murphy * Audrey Rose * Little Buddha
